# Case Study: Vindhya State Wide Area Network (SWAN) O&M

Synthetic case study of a fictional project for the TenderBridge demo.

## 1. Project facts

| | |
|---|---|
| **Project ID** | PRJ-005 |
| **Client** | Vindhya State e-Governance Society (fictional state agency) |
| **Client type** | State Government society |
| **Contract value** | ₹38.00 crore (including taxes); total consortium contract value. Nimbus share ₹17.10 crore per consortium agreement (not certified by the client) |
| **Period** | 1 February 2020 to 31 January 2025 |
| **Status** | Completed |
| **Nimbus role** | Consortium member (not lead); Nimbus share 45% as per consortium agreement |
| **Data centre racks** | Not applicable |
| **Technologies** | Cisco, MPLS, OpsCentral NMS |
| **Completion evidence** | KB-CC-004 |

## 2. Client context

Vindhya State e-Governance Society operates the State Wide Area Network with about 1,150 points of presence. The O&M contract was awarded to a consortium led by Trident Infratel Ltd (fictional), with Nimbus as the second member.

## 3. Scope delivered by Nimbus

- Nimbus scope: operation of the state NOC (24x7) and L2 field support for network incidents
- Lead member scope: bandwidth, field hardware maintenance and civil works at points of presence
- Joint scope: monthly SLA reporting to the client

## 4. Implementation timeline

| Period | Milestone |
|---|---|
| Feb 2020 | Go-Live of consortium operations |
| 2020-2024 | O&M |
| 31 Jan 2025 | Completion |

## 5. Team

Nimbus team of 26 (NOC and L2 field engineers).

## 6. Solution and operating model

Two-member delivery model: Nimbus ran the 24x7 state NOC and L2 field support; the lead member handled bandwidth, field hardware and civil works. A joint escalation matrix and a joint war room handled P1 incidents.

## 7. Outcomes

SWAN uptime 99.5% monthly average (illustrative synthetic figure). These figures are invented for the demo and must be cited only as case-study statements, not as audited results.

## 8. Governance

Monthly service review with the client chaired by the client's nodal officer; quarterly steering committee; SLA reports from tool data audited by the client's third-party auditor where one was appointed. Escalation: shift in-charge, project manager, delivery head, Nimbus VP - Public Sector Business.

## 10. Challenges and lessons learned

Two-member delivery required a joint escalation matrix; Nimbus ran the joint war room for P1 incidents.

## 11. Relevance notes for bid teams

Nimbus was a consortium member. The client's completion certificate (KB-CC-004) states only the total contract value and does not state Nimbus's share. The 45% share comes from the consortium agreement, which is a private document between the members.
