Business Continuity and Disaster Recovery Policy

Owner: Meera Nair, CISO | Version 2.3 | Effective 1 October 2025 | Next review 30 September 2026

Document control

Field	Value
Document ID	KB-POL-003
Classification	Internal
Owner	Meera Nair, CISO
Approved by	MD & CEO (fictional)
Applies to	All Nimbus employees, contractors and engagements
Related documents	KB-POL-001, Client DR runbooks

1. Scope

Continuity of Nimbus's own delivery centres and remote NOC, and the DR services Nimbus provides to clients. Nimbus is not certified to ISO 22301.

2. Nimbus internal recovery objectives

Service	RTO	RPO
Remote NOC (Pune) failover to Bengaluru	2 hours	Not applicable
ITSM and EMS platform	4 hours	1 hour
Corporate e-mail and collaboration	8 hours	4 hours

3. Client DR services

For client DR services, Nimbus designs to the RPO and RTO stated in the client contract; typical designs target an RPO of 15 minutes and an RTO of 4 hours for critical applications. Achievement depends on application architecture, replication technology and bandwidth, and is demonstrated only through drills.

4. Testing

Internal BCP tests twice a year; client DR drills as per contract (typically quarterly) with reports within 7 days.

5. Policy status

This policy was due for review on 30 September 2026; the review is in progress and the current version remains in force until the revised version is approved.

6. Roles

The CISO owns this policy; the Head of Delivery owns the recovery of client services; each engagement has a DR coordinator.

7. Crisis communication

A crisis team (CEO, CISO, Head of Delivery, Legal) is convened for events affecting more than one client or a delivery centre.

Compliance and monitoring

Compliance with this policy is checked in internal audits twice a year and in certification audits. Breaches are handled under the disciplinary procedure. Exceptions follow the exception process of the owning function and are recorded with an expiry date.

Revision history

Version	Date	Change
2.0	2023-10-01	Separated internal and client DR objectives
2.3	2025-10-01	Updated NOC failover RTO
