Document control

Field	Value
Document ID	KB-POL-002
Classification	Internal
Owner	Sanjay Iyer, Head - Quality & Process Excellence
Approved by	MD & CEO (fictional)
Applies to	All Nimbus employees, contractors and engagements
Related documents	KB-POL-005, Process library, KB-CERT-001, KB-CERT-003

1. Quality policy statement

Nimbus delivers IT infrastructure services that meet agreed service levels, measured from tool data, and improves them every quarter. The quality management system is certified to ISO 9001:2015 and our service processes are appraised at CMMI V2.0 Maturity Level 3 (Services).

2. Quality objectives (FY 2026-27 targets, not achieved results)

Objective	Target
SLA compliance across managed services contracts	>= 98% of measured parameters each month
Customer satisfaction score	>= 4.2 of 5
P1 root cause analyses on time	100% within 5 working days

3. Process framework

Service delivery follows KB-POL-005. Process assets are maintained in the process library, with tailoring guidelines per engagement.

4. Audits and reviews

Internal quality audits twice a year per engagement; management review every quarter; corrective actions tracked to closure.

5. Measurement

Each engagement reports SLA, incident, change and customer satisfaction metrics monthly to the quality team.

6. Customer feedback

Customer satisfaction surveys every quarter for managed services; scores and actions reviewed in the monthly service review.

7. Nonconformity and corrective action

Every SLA breach that leads to a penalty is treated as a nonconformity with root cause analysis and corrective action.

Compliance and monitoring

Compliance with this policy is checked in internal audits twice a year and in certification audits. Breaches are handled under the disciplinary procedure. Exceptions follow the exception process of the owning function and are recorded with an expiry date.
